

A Day Without Deportations

Struggles for the right to stay, against racist laws, against pending deportation and lager, for legalisation and global social rights: the anti-racist movement is manifold and active. But too often, we are trapped in defence or concentrate on individual cases that show the barbarity of the deportation system.

We would like to link to these regional struggles and give them a corporate perspective. We don't want to look back on the time before the law of asylum was changed, but look forward onto the enforcement of freedom of movement and fundamental critics of border control and migration management.

Therefore we suggest a nationwide *Day Without Deportations* for August, the 30th 2008. This date stands for the brutality of the deportation system as there have been four cases of death.

We want to blockade neuralgic points of the deportation system to interrupt the deportation business: in front of deportation prisons as well as at airports, near lager and at Ausländerbehörden and profiteers.

To prepare this, we call on you to initiate local alliances for the day of action and to contact us. We would like to coordinate and plan these actions together on the nationwide meeting of groups working on pending deportation (April 4th -6th 08 in Paderborn) and on BUKO (May 9th -12th 08 in Dortmund).
